The Company offers the details of this vessel in good faith but cannot guarantee or warrant the accuracy of this information nor warrant the condition of the vessel. A buyer should instruct his agents, or his surveyors, to investigate such details as the buyer desires validated. This vessel is offered subject to prior sale, price change, or withdrawal without notice.

OTHER:

If you are looking for a fast twin-stepped hull, modular aft cockpit layouts, and confident handling in demanding conditions, the Wellcraft 33 T-Top is built for you. With speed above 50 knots and smart onboard comfort, it is made to do more.

PURPOSE-BUILT FOR YOUR NEXT EXPLORATION

The bow cockpit creates an open social space for shared adventures, while the aft cockpit is fully configurable, with each layout built to match your plans on the water:

Lounge standard, built to maximize seating capacity and onboard storage.

Relax optional, a more comfort-driven layout with a large sunbed for three, a U-shaped dining area facing aft, a forward-facing bench, and generous storage.

Barracuda exclusive to the Wellcraft 33 T-Top, this family fishing-focused layout includes a live well, fish box, tackle storage, rod holders, and up to 11 forward looking seats.

BUILT FOR COMFORT AND CONTROL

At the helm, the driver-centric dashboard, high-end Garmin screens, integrated audio and air vents create a cockpit focused on command, visibility, and action.

The Wellcraft 33 T-Top combines rugged capability with a distinctive style in a design built to perform. Developed with Navia Design, its twin-stepped hull is engineered to cut through waves, plane fast, and give you stability and control at speeds exceeding 50 knots.

Inside, the layout offers up to 2 berths, combining generous overnight capability with clear, functional design.

W.I.S.E. HULL TECHNOLOGY

The Wellcraft 33 T-Top benefits from W.I.S.E. technology (Wellcraft Infusion Structure Engineering). By combining infusion and injection technology and integrating stringers and hull into one lighter, stiffer structure, W.I.S.E. improves power-to-weight ratio, reduces resin use, and supports a more environmentally responsible build process.

POWER

With single or twin V8 and V10 outboard engines from 350 HP to 700 HP, the Wellcraft 33 T-Top offers the freedom to choose the ideal power package for confident offshore performance above 50 knots.
